

CLEAN SCHOOL SOLUTIONS

ATHEA® LABORATORIES and SCHOOLS

Schools have several different areas with unique challenges and needs. Kitchens and dining areas that need to be kept sanitary and running efficiently; restrooms that require constant cleaning; common areas that must be kept attractive; athletic areas that need to be clean and sanitary; and grounds that need to be kept beautiful and safe.

ATHEA® Laboratories is the leading manufacturer of specialty chemicals, providing products for all of these specific areas of a school, including pre-moistened towels, specially-cultured bacterial-enzymes, effective herbicides, and powerful degreasers. In short, ATHEA® can provide everything a school needs to stay clean and safe.

BACTERIA/ENZYMES

Not all bacteria are created equal. ATHEA® uses the highest-quality bacteria available, from five different strains, all cultured for a specific purpose. Our freeze-dried bacteria are in spore form, rather than vegetative adult form, for greater stability and longer life. And, our bacteria replicate every 20 minutes and consume organic waste thousands of times faster than naturally-occurring bacteria, for unmatched performance.

WET WIPES

ATHEA® is the leader in pre-moistened wipes and towels. From disinfecting wipes, to powerful cleaning towels and polishing wipes, we have products to address even school's specific needs, while reducing labor time and costs.

HERBICIDES

Through extensive research, ATHEA® provides a superior selection of selective and non-selective herbicides designed with school's specific needs in mind. The result is better-looking grounds and reduced labor.

CLEANERS and DEGREASERS

From grease to urine to gum to food, ATHEA® manufactures a full line of the most effective cleaners available to address schools' specific cleaning needs.
