# Pro-Series® Wipers Disposables

## Microfiber Replacements

*MDI Pro-Series nonwoven towels deliver the cleaning performance of microfiber with the cleanliness of disposables.*

MDI's Pro-Series disposable towel program is designed to help reduce the risk of cross-contamination and Hospital Acquired Infections (HAI) by providing cleaning personnel with a fresh towel for each housekeeping function or environment. Because the towel is discarded after use, it also eliminates the burden and associated costs of collecting, sorting and laundering microfibers.

An added benefit is the patient's peace of mind when observing hospital personnel completing a cleaning task and discarding the soiled towel.

Pro-Series disposables are cloth-like engineered towels. They are strong, solvent resistant, low lint, durable and can be used with a broad range of bleach, quat and iodine based chemical cleaners and sanitizing solutions.

Microfiber towels are often placed in a sanitizing solution to charge and the same may be done with Pro-Series disposables. They hold and release the sanitizer so surfaces are fully saturated and allow for the proper dwell time.

Pro-Series disposables are packaged in plastic polybags to stay fresh and clean prior to use. The convenient ¼-fold format eliminates the need to fold towels upon removal from sanitizing solutions.

The Pro-Series program offers different material weights to ensure the best product is chosen for each cleaning protocol. While many end users gravitate to the heavyweight ("Best") towel, tests have shown that the lightest weight ("Good") towel is effective for many applications at a lower cost.

Please contact MDI today to receive Pro-Series test samples and experience their functionality, convenience and value.

|            | BEST                          | BETTER                        | GOOD                          |
