What Would You Rather Work With?

#91141
Jumbo ≥ 70 lbs
Roll of rags

#93141
Tote ≥ 30 lbs
Box of rags

#93580
Two ≥ 25 lbs
Pak of rags

Did you know that rental shop towels can contain lead and other heavy metals even after laundering? Have you considered that your employees could be at risk for overexposure to these potentially toxic contaminants?¹ Could your work processes be compromised by the presence of foreign objects or the inconsistent size and material performance you get with rags? Pro-Series engineered disposable towels are a reliable and consistent answer to help

protect your people and processes from uncertainty.

Our heaviest towels, Pro-Towel Heavy Duty, are manufactured extra thick and bulky to increase absorption and extend their useful life. Fewer wipers per task means less waste generated. A jumbo roll of Pro-Towels can replace a 70 pound box of rags while a tote box can replace 30 pounds and a Two Pak at least 25 pounds. That means less space required for storage AND you get a fresh clean wipe

for every application. When it comes to performance, versatility, reduced waste and lower cost, Pro-Towels outperform rags every time.

Pro-Series towels for rag replacement come in a variety of sizes and package options so that you can right-size the wipe to the task, control usage and achieve the lowest cost-in-use.

Contact MDI today for more information and product samples.
